STAT

SUBJECT: Comparison of "Major Outputs"
with CIRIS Subjects

A couple of questions come to mind as a
result of reading your memo:

1. The headings on both Tables 1 and
2 on CIRIS-relatable subjects seem to be
scaled wrong. Are those dollars in thousands
or something else?

2. How would the categories in which
we gather the budget data spread them-
selves across either the OMB list or our
list?

If you could look into number 2 and we could
talk about it perhaps on Tuesday before sending out
a memo to the PRC(I) Senior Working Group would be
most helpful.
